

The New Tooth Fairy Tradition. Age-bracket 6-12 years (allow for a considerable variation)

Recording the shedding-date of **20 milk teeth**: **10** 'uppers' / **10** 'lowers', PLUS recording the eruption-date of the **first permanent back teeth** that happens around 6 years of age. In order to better understand the intense dynamics of the 'mixed dentition' during the elementary school years, go to the **Panoramic Dental Illustration** pag.154-155, and to the **Crown of the 6es** pag.156-157.
