

THE MILK DENTITION

Dental scheme for recording the date of appearance of the **20 milk teeth** that constitute the milk dentition: 10 'upper' and 10 'lower' teeth. Simplified time-line of eruption: Lower **a's** at 6 months. All 8 **front teeth** - 4 **a's** and 4 **b's** - present at 15 months; **c's** and **d's** at 18 months; **e's** erupt at second birthday. Around 2 1/2 years of age all of the 20 milk teeth are generally present. Allow for a considerable variation.
