

The Little Magic Chests

The Queen now explains the duties to be fulfilled by the Tooth Fairy. When a child is born a **Little Magic Chests** is reserved for him at the Tower of Light and will be the safe box for his or her **20 milk teeth**. With **every tooth** placed inside that has been collected by the Tooth Fairy and/or Mouse, sweet childhood memories, plays and songs are preserved.

These memories make up a crucial part of the emotional world of that person. In times of trouble or happiness, adults frequently think about them and are inspired by them enormously. By doing so, the magic inside the chests transforms the emotional energy into light. As you can imagine, when many **Little Magic Chests** shine at the same time, the whole Tower becomes a sort of a light-house for the whole Kingdom, hence its name The Tower of Light. This is precisely the reason for the lyrics in our Tooth Fairy song:

‘The Tower of Light, it shines so bright
with the children’s memories’.

The **Little Magic Chests** is truly a psychological sanctuary, not only during the childhood days, but throughout the entire life of an individual. Don’t forget to listen to the song ‘Days of Wonder’, you will love it! www.fairyandmouse.com

As you can see on the illustration on the right, the **Little Magic Chest** is *also* intended to keep the **4 ‘Coins of the 6 👑’**, that represent the **4 first permanent back teeth** that show up at around **6 years of age**. The Tooth Fairy will collect each ‘Coin of the **6 👑**’, just as if they were **milk teeth**. However they are so important that she will leave *twice the money* plus a toothbrush, and who knows, perhaps even a *surprise gift* too’. She knows that the child will follow the advice of ‘*brush every day and keep sugars at bay*’.
